Equinix Frankfurt Data Centers

Equinix is the world's digital infrastructure company™. Digital leaders harness our trusted platform to bring together and interconnect the foundational infrastructure that powers their success. Our Frankfurt data centers are business hubs for 1,040+ companies. Frankfurt customers can choose from a broad range of network services from 280+ providers, and they can interconnect directly to customers and partners in their digital supply chain. The Equinix Frankfurt metro consists of nine buildings (two xScale and seven International Business Exchange™ (IBX®)) with approximately 864,000 square feet (80,000 square meters) of colocation space.
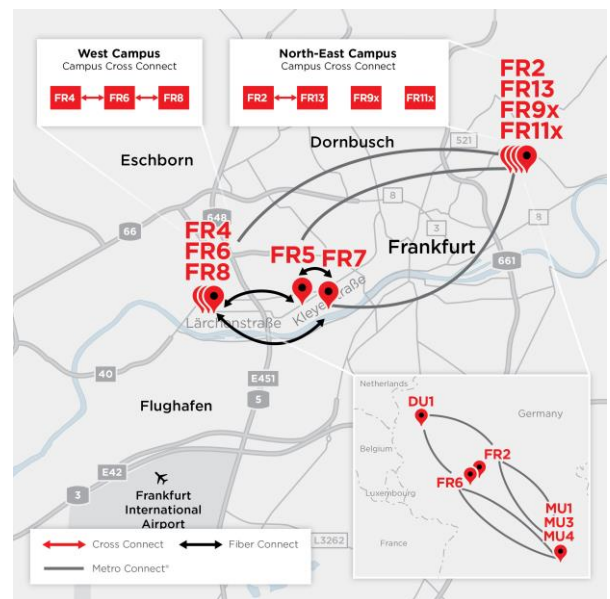

The Equinix Frankfurt colocation facilities enable customers to be part of a rich industry ecosystem and feature a dense concentration of telecommunications, financial services and manufacturing companies. Our data centers are among the world's most carrier-dense, thanks in part to our partnership with DE-CIX Frankfurt, the largest internet exchange point in the world. Additionally, Equinix also offers access to our very own Equinix Internet Exchange®, as well as access to the services of several other IX providers.

Frankfurt Data Centers Benefits

- Central location and Germany's strong data privacy laws optimize European data center operations deployment
- Multiple interconnected Tier 3+ sites offer business continuity and disaster recovery operations
- Aggregation point for networks serving five continents, with one of Europe's highest network densities
- Large concentration of electronic trading and capital markets in the eFX ecosystem
- European gateway to global trading opportunities with 150+ financial services firms and 20+ trading venues participating in the local financial ecosystem
- Provides secure, resilient and compliant colocation
